

Conflict Minerals Policy

RedWave Labs is committed to carrying out business fairly and ethically. Redwave Labs' products contain electronic components, some of which contain tin, gold and tantalum. These metals are smelted from minerals that can be found in the conflict areas of the Democratic Republic of Congo and adjoining countries Republic of Congo, Central Africa Republic, South Sudan, Zambia, Angola, Tanzania, Burundi, Rwanda and Uganda. Armed groups in this area can directly or indirectly benefit from the mining and selling these minerals.

We choose suppliers that have a conflict-free minerals policy and interrogate them on the sources of their minerals. We record the possible origin of minerals used by our suppliers. Redwave Labs recognises the importance of ongoing efforts in this area.
